
EDUCATION

Baroda High School, Bagikhana

Higher Secondary Education; Passed with 72%

Parul Polytechnic Institute

Diploma of Computer Application; CGPA : 9.61

Vadodara, India

2020 - 2022

Vadodara, India

2022 - 2025

SKILL SUMMARY

- **Languages:** Html, Bootstrap, Css, Js, Python, Php, SQL, Android, XML
 - **Frameworks:** Flask, Streamlit, Django, Pandas
 - **Tools:** MySQL, SQLite, Figma, Canva
 - **Platforms:** Pycharm, Visual Studio, Android Studio
 - **Soft Skills** Excellent Communication, People Management, Strong Stake Holder Management
-

WORK EXPERIENCE

Android Developer Intern | Intel | [Link](#)

March, 2024

- Developed and deployed a centralized Android application (HandyHelper) using Java and Android Studio, enabling streamlined access to public services such as healthcare, education, finance, and transport.
 - Designed and implemented a secure user authentication system, improving app data security and user privacy using PHP and MySQL.
 - Integrated full-stack components using PHP, HTML, CSS, JavaScript, and MySQL, enhancing app responsiveness.
 - Contributed to backend data architecture and modular system design, enabling easy feature scaling and efficient data handling for over six core service modules.
 - Collaborated in a multidisciplinary team environment, refining skills in full-stack development, user-centric design, and agile project management practices.
-

PROJECTS

Creato Hackathon | [Link](#)

- Recognized for dedication, teamwork, and innovative thinking in solving real-world challenges during a collaborative tech event.
- Demonstrated a commitment to pushing boundaries and creating impactful solutions through effective collaboration and creative problem-solving.
- Award serves as a reminder of achievements and a motivation to continue striving for excellence in the tech community.

Anti Doping | [Link](#)

- Developed a responsive and user-friendly frontend interface for the Anti-Doping web solution, aimed at promoting fair play by enhancing transparency and accessibility of doping-related data.
- Integrated real-time data visualization and interactive components using modern web technologies (e.g., HTML, CSS, JavaScript, and APIs), ensuring intuitive user experience and efficient data presentation.
- Designed with scalability and deployment readiness in mind, allowing seamless integration with backend systems and real-world adoption in sports governance or anti-doping agencies.

Handy Helper | Final Year Project | [Link](#)

- Centralized Android application built with Java (Android Studio) to streamline public access to essential services like education, healthcare, finance, and government schemes.
 - Full-stack implementation using MySQL, PHP, HTML, CSS, and JavaScript to create a unified, responsive, and user-friendly interface for individuals with limited technical experience.
 - Secure login and data handling system integrated to ensure user privacy and reliable backend operations.
-

CERTIFICATION

Certificate of Achievement – Creato Hackathon | [Link](#)

- Awarded for outstanding dedication, collaboration, and innovative thinking demonstrated throughout the event.
- Core Values: Innovation · Teamwork · Problem-Solving · Continuous Learning

Harvard University | [Link](#)

- Recognized for exceptional dedication, teamwork, and innovative problem-solving in addressing real-world challenges through collaboration and creative thinking.
- Skills: Python (Programming Language), Teamwork, Innovation, Problem Solving

Python | Udemy

- Currently pursuing a comprehensive Python Udemy course covering basics to advanced topics, including frameworks like Flask, Django, and Streamlit.
